WORK EXPERIENCE

KaveyCode Backend

2025 - Present

Backend Developer

- Developed a secure, scalable RESTful API using Java and Spring Boot to manage user authentication, authorization, and profile management.
- Integrated Keycloak for role-based access control (RBAC), supporting admin and user roles with JWT authentication.
- Implemented CRUD operations for user management, including profile updates, password reset, and account deletion.
- Collaborated with frontend team for seamless integration of authentication and user data features.
- Integrated PostgreSQL and Hibernate/JPA for efficient data persistence and optimized database queries.
- Contributed to CI/CD pipeline setup and deployment using Docker and GitHub Actions for automated testing and delivery.
- Participated in code reviews and team discussions to maintain high code quality and improve project scalability.

KVS Furniture

2024 - 2025

Web Developer

- Design and implement user-friendly, responsive, and visually appealing web interfaces.
- Developed and maintained server-side logic using PHP and managed MySQL databases for efficient, secure data handling.
- Collaborated with team members to ensure smooth integration between frontend and backend components.

CONFIRMATION
